150 Old Gothic spouting features a Colonial styled detailing that will suit any Kiwi home, old or new. The larger shape provides great access for cleaning and its high front is perfect for hiding roof edges. This profile is also perfect for houses with minimal downpipes as it's larger capacity allows the spouting to carry the water to the outlets without overflowing. Also available in the smaller capacity 125 Old Gothic Spouting. On larger builds, consider using 150 Old Gothic on larger roof areas and main residences and 125 Old Gothic on dormers, bay windows, pool houses, decks and small out buildings. An extremely strong and versatile profile.
