

Coloursteel 75x55mm Rectangle Downpipes

Roof Pitch	Maximum Roof Area served per downpipe (m ²)
0° – 25°	60
25° – 35°	50
35° – 45°	40
45° – 55°	35

Coloursteel 75x55mm downpipes add the finishing touch to your installation. Coloursteel downpipes are available in a wide range of colours and these are detailed in our colour chart. The standard bends are 95 degrees but custom angles can be done by hand mitring the pipes. Bends and joiners utilise cast aluminium fittings that are powdercoated to match the colour of the downpipe. Fixing is done with holderbatts which offer greater flexibility when varying offsets from the cladding are needed.

Holderbatts - Manufactured in aluminium then powdercoated to match the downpipe colour. Holderbatts are ideal for installations against weatherboards or with narrow soffits where a variable offset from the wall is required. The length of the threaded rod is cut to suit the offset of the pipe from the wall.
