Fits 100mm Downpipes	YES	PVC or Metal
Fits 150mm Downpipes	YES	PVC or Metal
Fits Leafguard	NO	

300 Box gutter is the largest and widest capacity standard gutter on the market. It is ideal for commercial applications where large roof areas need large capacity gutters. It is able to handle huge volumes of water or snow and it is particularly easy to clean out if required due to the large pan and external brackets. Whilst it is not standard 150mm drainage pipe can be used as a downpipe to allow large volumes of water to be removed quickly from the gutter.
