Fits 65/80mm Downpipes	YES	PVC or Metal
Fits 100mm Downpipes	YES	PVC or Metal
Fits Leafguard	NO	

Bevelled box gutter has industrial capacity but the softer shape makes it perfect for both commercial and domestic use. This profile will handle the biggest downpours and snow too. It is installed with powdercoated aluminium external brackets so cleaning is easy. Extra thick 3.8mm aluminium is used to manufacture these brackets which deliver all the strength you need in a larger profile spouting. Bevelled box can be used on everything from commercial through to residential new builds and replacements (it's great for use in homes that have limited stormwater drainage)
