Fits 100mm Downpipes	YES	PVC or Metal
Fits Leafguard	YES	Custom folded aluminium. Internal brackets only

125 Box gutter has a large capacity and suits both traditional and contemporary homes. With a front face that sits 60mm higher than the back face it is ideal for hiding roof lines on low pitched roofs and also has excellent water catching capacity for high pitched roofs. 125 box gutter is a great alternative on domestic homes where the larger more commercial size box gutters would look out of place.

125 box gutter has the swages (grooves as shown in the picture) in the front and bottom face as standard. On request this product can be manufactured flat (swageless). Important note for swageless box gutter - The fascia being installed on needs to be straight and plumb with no twisting/warping etc. Any distortion in the fascia will be seen in the spouting.
